---

**Hello. I am writing to you today about Glyphosate. This is a dangerous chemical harming all of us. Glyphosate herbicide has been found in tap water, our children's urine, mother's breastmilk, and childhood vaccines.**

**Glyphosate has been shown by Monika Kruger of Germany to bioaccumulate in bone marrow, muscle tissues etc.**

**One way glyphosate functions is by breaking down the blood-brain barrier and allowing other toxins (such as those found in vaccines and herbicides) into the brain.**

**Glyphosate is a neurotoxin, chelator, antibiotic, and carcinogen which also causes liver disease.**

**We MUST demand a ZERO safe level of glyphosate.**

**Thank you for your consideration.**
